

International Development Consult  
(I.D.C.)

## APPLICATIO

International Development Consult - I.D.C. supports the development and international competitiveness of companies from trade, industry and services as well as public institutions and organisations (of the civil society) through e.g.

- Organisational development
- Transfer of adapted know-how
- Development of international markets and export promotion
- Management and leadership consulting
- Product and service development and marketing planning
- Promotion of existing personnel through training and further education measures
- Selection and use of technologies that combine economy and ecology
- Use of alternative energies, e.g. on the basis of waste from agriculture and forestry
- Sustainable forestry

The focus of I.D.C.'s work is on advising SMEs, associations, chambers, educational institutions and networks.

I.D.C.'s services are developed and provided on a project- and customer-specific basis. International consulting and project management services are based on systematic planning and implementation:

- regional and subject-specific experience
- intercultural management and
- the ability of the partners involved to cooperate
