

eService of APPLICATIO mainly uses Free and Open Source Software in its projects and advises partners and projects in the area of the use of this software.

A small selection of particularly interesting products is presented here. These can be freely obtained, downloaded and used and are also actively included by APPLICATIO in its own work.

Moodle is one of the best known learning management systems ever. APPLICATIO uses Moodle for its own eAcademy.

Our installation can be found here: <http://e-academy.applicatio.com/moodle>

CamStudio allows the user to record screen content and audio and make it available as video. AVI videos and/or Flash videos (SWFs) are created.

OwnCloud is a cloud solution similar to Dropbox with numerous advanced functions, such as calendars, task planning, etc. OwnCloud supports i.a. data storage, data sharing and synchronisation.

Our installation can be found here: <http://cloud.applicatio.com>

Framadate is an online service that helps you to arrange appointments or make decisions. No registration is required. Our installation can be found here:

<https://applicatio.com/framadate/>

Group-Office (goffice) is an enterprise CRM and groupware tool. Share projects, calendars,

files and e-mail online with co-workers and clients. Easy to use and fully customisable.

LimeSurvey is a survey and voting solution that APPLICATIO uses on its own servers in Germany for its own projects and third-party projects.

Our installation can be found here:

<http://www.survey.applicatio.com/>

YOURLS steht für Your Own URL Shortener. Es ist ein kleiner Satz von PHP-Skripten, die es Ihnen ermöglichen, Ihren eigenen URL-Kürzungsdienst (a la TinyURL oder Bitly) auszuführen.

[Our installation can be found here:](#)

<https://applicatio.com/yourls/>

osTicket is a popular open source support ticket system. It seamlessly combines requests made via email, phone or online forms into one easy-to-use web-based interface.

[Our installation can be found here:](#)
