

APPLICATIO assist the programme "Development of integrated MRV systems for REDD+ in the SADC region" of GIZ by assisting in the establishment of a Training Centre for REDD+ in the SADC. The project promotes the development of REDD+ MRV competences in the SADC region, and encourages regional cooperation and exchange between the SADC member states. As such, it contributes to the implementation of the regional SADC REDD Programme 2012-2015.

APPLICATIO's tasks include:

- Support in the identification of a suitable training centre
- Training-Needs Analysis in SADC
- Development of curricula and training material
- Training-of-trainers
- Pilot training implementation
- Project management, monitoring and evaluation
