

APPLICATIO was commissioned by Fachverband Biogas e.V. to conduct a virtual planning workshop for a chamber and association partnership project (financed by BMZ via sequa). As a hybrid event with all partners of the project, the planning workshop will result in both a detailed annual plan and a three-year plan.

The Chamber and Association Partnership (KVP) between the German Biogas Association (Fachverband Biogas e.V.) and the Uganda National Biogas Alliance (UNBA) started on 1 December. The aim of this project, which is initially limited to three years, is to promote the production and use of biogas in the East African country. The partnership is financed by the German Federal Ministry for Economic Cooperation and Development (BMZ) and managed by sequa gGmbH.
